Profile

Computer Engineering student with strong skills in Python, Backend Development, Machine Learning, and Data Analytics. Experienced in building web applications and data-driven solutions using Django, React, MySQL, and modern development tools. Possess a solid understanding of data structures, algorithms, and software engineering principles. Passionate about solving real-world problems through technology and continuously enhancing technical expertise. Seeking an entry-level Software Developer, Python Developer, or AI/ML role to contribute, learn, and grow in a dynamic environment.

Education

LJ Institute of Engineering and Technology	Aug 2023 - Present
Bachelor of Engineering in Computer Engineering - CGPA : 9.48	Ahmedabad, Gujarat

Technical Skills

- Languages** : Python, Java, SQL
- Web Technologies** : HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js
- Databases** : MySQL, MongoDB, SQLite
- Libraries & Frameworks** : Pandas, NumPy, Scikit-learn, TensorFlow, Plotly, Django REST Framework
- Tools & Technologies** : Git, GitHub, Docker, Power BI
- Domains** : Machine Learning, Deep Learning, Data Analysis, Backend Development

Projects

PharmaRootz	Aug 2025
Built PharmaRootz, a Django-based pharmacy management system featuring inventory control, customer management, billing, and sales tracking. Integrated AI-powered disease-based and medicine substitution recommendations, along with automated invoice generation and a responsive user interface for improved usability.	
Blogging App	Nov 2025
Developed a full-stack blog application using React and Node.js, featuring JWT-based authentication, rich text story creation, commenting, and reading list systems. Implemented a responsive UI with complete dark/light theme support, skeleton loading, and user profile management for an enhanced user experience.	
Game Zone	May 2024
Created a java based Game Management System using file handling to manage player data and scores. Included features to add, search, update, and delete records through a user-friendly console interface. Admin-only actions were protected with a password system to ensure secure access.	

Certifications

DBMS Course - Master the Fundamentals and Advanced Concepts <i>Scaler</i>	Jun 2025
Exploratory Data Analysis for Machine Learning <i>IBM</i>	Jun 2024
Inheritance and Data Structures in Java <i>University of Pennsylvania</i>	May 2024
